

Clinic Records Recorder

The Clinic Records Recorder ensures that all cats are accounted for before they leave the clinic, keeps track of all veterinarians and veterinary students who participate in the clinic, documents the vaccination status of each cat, verifies information on the Medical Record, Veterinary Examination Form, and Rabies Certificate, completes the treatment summary at the bottom of the Rabies Certificate, attaches To Go Home instructions to the Rabies Certificate/Surgery Recovery Instructions, files the completed forms, maintains a record of any problem that occurs during the clinic, completes the Clinic Report and submits all records and reports at the conclusion of the clinic.

Safety First

- **Visually monitor the cats closely.** If the cat is moving, blinking or licking, then it is recovering normally. If the cat is fully sedated, watch the chest for movement. Breathing can be very shallow and difficult to see. A normal respiratory rate is 6 or more breaths per minute. If breathing is less frequent or isn't visible at all, alert the Medications Technician to do a hands-on assessment immediately.

Station Alert

- **All cats that enter the clinic must be accounted for** in the Clinic Cat Log (alive or deceased).

Clinic Records Recorder Instructions

1. **Collect all plastic sleeves and alert tags.**
2. **Confirm that the identification number** on the cat's paw tag matches the Medical Record.
3. Fill out the Rabies Certificate.
4. **Transfer the following information** from each cat's Medical Record/Veterinary Examination Form to the Clinic Cat Log, sign and date:
 - Gender and color of cat.
 - Cat's surgical status, i.e. pregnant, lactating, in heat, kitten, cryptorchid male.
 - Number of fetuses, if pregnant.
 - Name of the DVM or veterinary student who performed the surgery.
 - Location of the spay site, flank or midline. Double-check by checking the cat's flank.
 - Fluids or other post-surgery treatment ordered.
 - Other observations or complications.

Clinic Cat Log Clinic Date: _____ Page ____ of ____

CAT#	SEX M/F	COLOR	STATUS P-L-H-K-C	#FETUS	VET	STUDENT	SPAY SITE	FLUIDS? VOLUME?	COMMENTS
F19- 1									
F19- 2									
F19- 3									

5. **Record the names of each clinic veterinarian and veterinary student (DVM, spay veterinary student, and neuter veterinary student) who participated in the Clinic Veterinarian Log, sign and date:**
- Note the names of the spay and neuter veterinary student supervisors on the Clinic Veterinarian Log
 - Update the list as needed throughout the duration of the clinic.

Clinic Veterinarian Log Clinic Date: _____ Page ____ of ____

Veterinarians		Students		Students	
Name		Name	S or N?	Name	S or N?

6. **Review the Medical Records, Veterinary Examination Forms, and Rabies Certificates for completeness.** These documents serve as a legal record of each cat's treatment at the clinic:
- Verify that fluids ordered and additional medications ordered have been transferred from the Veterinary Examination Form to the Medical Record.
 - **Carefully** transcribe special procedures (fluids, extra antibiotics, wound care, additional medical procedures or findings. etc.) and caregiver instructions from the Veterinary Examination Form and the Medical Record to the treatment summary at the bottom of the Rabies Certificate so the caregiver has a complete understanding of their cat's condition and care.
 - Review the Veterinary Examination Form for To Go Home orders requested by the DVM.
 - Review the Veterinary Examination Form and both the original and copy of the Rabies Certificate to ensure a valid coat color has been entered for the cat. Enter a valid coat color if this information is missing.
 - Make sure the Medical Record and both the original and copy of the Rabies Certificate include the proper date.
 - Separate the 2-part Rabies Certificate, once it is completed. The white original copy is sent to the Discharge Station for distribution to the caregiver, while the

yellow copy will be filed with the corresponding Medical Record at the Clinic Records Station.

- Staple to-go-home order slips to the caregiver's original (white) copy of the Rabies Certificate being sent home with the cat at the Discharge Station.
 - File the completed Medical Records and duplicate (yellow) copy of the Rabies Certificates in numerical order.
 - Send the original (white) Rabies Certificate and any attached to-go-home order slips to the Discharge Station.
7. **Sort all plastic tags that have been removed from cats.** Remove any masking tape from the back of the all tags and (if possible) affix new masking tape so that the tags are ready for the next clinic.
8. **Record any problem that occurs**, no matter how trivial, in the Clinic Incident Log:
- Enter the Cat ID # and the name of the person who reported the incident.
 - Describe the incident and JHS Feline Frenzy's response.
 - Sign and date the log.

Note: The Clinic Incident Log is required by the State Veterinary Board and is also used internally to improve future clinics and to ensure clinic safety.

Incident Log

Date	Cat #	Incident	Reported By	Response

9. **Complete the Clinic Report**, when the clinic has concluded:
- Enter the number of veterinarians, volunteers and cats.
 - Record the start time of the first surgery and end time of the last surgery
 - Record the total hours of surgery.
 - Note the time when discharge concludes.
 - Sign and date the report.
 - Ask the Clinic Supervisor to complete end times if they occur after the Clinic Records Recorder leaves for the day.

Note: The Clinic Report is used internally to improve future clinics and to ensure clinic safety.

Clinic Report **Date:** _____

ITEM	NUMBER	COMMENT
Number of veterinarian surgeons		
Number of vet student surgeons		
Number of other volunteers		
Number of cats for surgery		
Number of cats for vaccinations		
Number of cats for other care
